

# Processing Codes/System Requirements

This section provides charts and tables that include an explanation of the different reject codes and how to respond to each. Other tables provide information that further explains some of the other processing codes associated with the EDE process.

---

## Summary of Tables

In this section you will find several tables that will assist you when reviewing files.

### **1999-2000/2000-2001 ISIR Cross-Reference**

This NEW table is a cross reference of the 1999-2000 Institutional Student Information Records (ISIR) field number, start position, and end position with the 2000-2001 ISIR field number, start position, and end position.

### **Table of Reject Codes and How to Respond to Each**

This table is used to determine what the reject code on a Student Aid Report (SAR) means. It also tells you how to correct the reject and if there are any comment codes associated with this reject.

### **Batch Level Error Messages**

This table associates reject codes at the batch level along with the text for that reject code and a description of the error and a resolution. These error messages mean the batch was not processed. The structure of the file was not valid and the Central Processing System (CPS) was not able to process the file. You will need to fix the file and send it to the CPS again for processing. No Institutional Student Information Records (ISIRs) will be generated when there is a Batch level error.

### **Record Level Error Messages**

This table reports the record level reject codes. The actual text for each reject code, a description of the error and a resolution for each error is also listed here. These error messages mean that the individual student record was not processed. Any student in the batch that did not have a record level error message will have an ISIR processed for them. (Those ISIRs will be sent back later in another file.) You will need to fix any student record with a record level error message and send it to the CPS again for processing so an ISIR will be generated.

### **Assumption Overrides**

This table associates the override codes with the assumption being made. It also explains what will happen if you use this code and an example of when you would use this code.

### **SAR/ISIR Correction Flags Correction/Highlights**

This table is used to determine what fields were corrected in the previous transaction or what fields are highlighted on this ISIR. It also defines the field positions for the SAR Field, the FAFSA field name, and the number on the FAFSA.

### **NSLDS Loan Program Codes**

These codes are used to determine the loan program code on up to 12 loans in the NSLDS portion of the ISIR.

## **Current Status Codes**

These codes are used to determine the current status on up to 12 loans in the NSLDS portion of the ISIR.

## **State/Country/Jurisdiction Codes**

This table is used to determine the valid state abbreviations used for Students Permanent State, Student's Driver's License State Code and for Student and Parent State of Legal Residence.

## **Correction Data Entry Specifications**

This table is used in conjunction with the History Correction Export Record Layout found in the Record Layout section. This table defines the SAR Field number and field length of the field. It defines what data is valid to send in on a correction record as well as if it is a signed value, the justification, and if the field can be corrected to blank.

## **ISIR Comment Codes and Text**

This table associates ISIR comment codes with the text for the code. It will also tell you if this comment sets the C code and if a reject code is associated with the code. This is helpful when you are trying to resolve rejects because you know which comments you need to pay special attention to.
